

## FINDING YOUR CASE IN PATH

There are two methods to search and locate cases in PATH. If you know the case number the quickest method is to input that case number into the **Go to Case:** fields available on the homepage. Alternatively you can locate cases for a patient from the homepage by searching for their Last, First Name, or SSN (see next page).

### Method #1 – Searching by Case Number

From the homepage locate the **Go to Case:** field, using either the box at the upper-right corner or middle of the screen, input the case number and click **Go** or **press ENTER** on your keyboard.
